

Safety with Style

6 finishes to match your current or future bathroom fixtures & with 6 lengths, you can always get the right one for your projects.

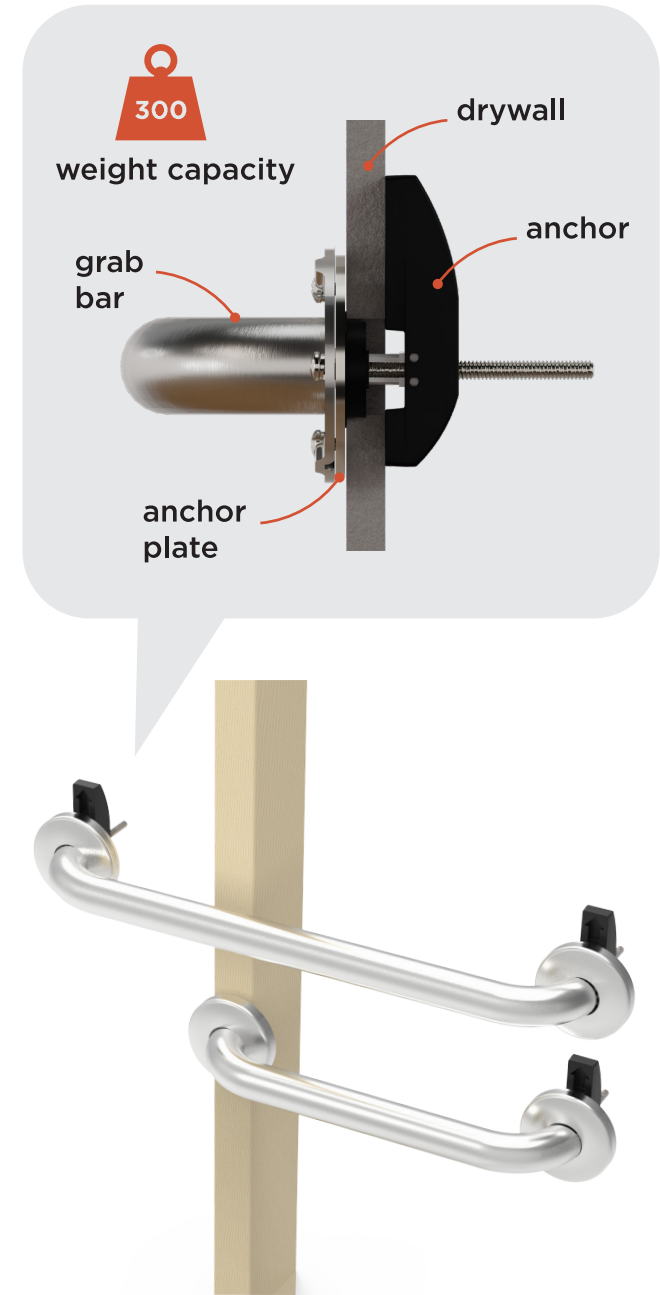

Versatile Installation

Our 9-hole flange offers more flexibility compared to other designs. Whether you're a DIYer or a professional our grab bars are easier and faster to install.

Install Where You Need It

Compatible with the Easy Mount Hollow Wall Anchor. Installation on fiberglass, tile and drywall is quick and secure, even without wood studs.

Everyday life made a little easier.

Why grab bars?

Grab bars are a great way to easily add safety in your home.

With grab bars installed you can:

- **Prevent falls** in the bathroom.
- **Enhance accessibility and independence.**
- **Support** you when **moving over steps and thresholds.**
- Gain additional stability for anyone who needs **extra support while standing, sitting,** or moving from one position to another.

Who are grab bars for?

The short answer is: **everyone.**

They may be especially important and even necessary for anyone with limited strength, balance and mobility issues.

Why choose the Easy Mount Grab Bar?

Safety is #1

Designed and tested to support 500lbs (12-24") & 400lbs (32-42"); exceeds ADA guidelines of 250lbs.
